

# **KOKOWALL® Garden Privacy Screen:** natural looking and ideally suited for plants!

*The Kokowall® Garden Privacy Screen's natural look befits any environment. The Kokowall® Garden Privacy Screen is more robust and larger than the Kokowall Garden Screen. The Kokowall® screen's outer side is finished with natural and durable coco fibres, which ensures a pleasing and ideal surface for climbing plants. The Kokowall® garden privacy screen will be overgrown with plants within a few years.*

**Kokowall®** garden privacy screen panels consist of galvanized steel U-channels filled with a row of coco fibre wrapped plastic poles. Two coco fibre taped steel poles reinforce the coco fibre plastic poles.

**Kokowall®** garden privacy screens are particularly suited for many types of climbing plants. That is why Kokosystems includes free of charge special plant clips that will help you secure the climbing plants to the coco fibre finish. The Kokowall® garden privacy screen is a patented Dutch design and is manufactured in the Netherlands.

# KOKOWALL® Garden Privacy Screen: natural looking and ideally suited for plants!

## Recommended Use

**Kokowall®** garden privacy screens can be placed between hardwood or galvanized steel poles. Kokosystems offers matching doors with a cylindrical lock or barn lock.

## Optional Features

**Kokowall®** garden privacy screens with bevelled edges and panels with galvanized concrete mesh and pointed picket style screens.

**Kokowall®** garden privacy screens can be fitted (horizontally and vertically) with steel mesh panelling and are available in the same galvanized steel frame of the **Kokowall®** Garden Screen.

## Size Range

Standard sizes **Kokowall®** garden privacy screen:

**Kokowall®** Garden Privacy Screen W x H 250 x 180cm

**Kokowall®** Garden Privacy Screen W x H 250 x 200cm

**Kokowall®** Garden Privacy Screen W x H 200 x 220cm

Standard diameter **Kokowall®** Garden Privacy Screen: 5 cm

The **Kokowall®** Garden Privacy Screen (W x H: 250 x 200 cm) weighs 42 kg. **Kokowall®** garden privacy screens can be made to measure at a cost effective price provided the width does not exceed 250 cm and the height is no less than 220 cm.

## Steel and Hardwood Poles

The screens can be mounted to hardwood poles (7 x 7 cm) with the (included) stainless steel assembly clamps (wooden poles not included). The screen's edges will be held secure by the galvanized steel pole's flange.

## Eco Friendly Product

The poles are made of recycled non-PVC plastic. Coco husk is sourced from the coconut's outer layer. The quality of durable tropical coco fibres is similar to that of tropical hardwood. Coconut husk is a recyclable and sustainable product.

## Plant Coverage

The **Kokowall®** garden privacy screen will be covered in plants quickly as the screen is ideally suited for climbing plants' aerial roots.

## Maintenance

Coco fibres will fade slightly due to sun exposure. The screens' natural looking exterior however will last. We recommend that the exposed screen sections are treated with stain or Bankirai hardwood oil.
