

# KOKOHUSK® Garden Screens

Gabions pre-filled with Coconut Husk parts!

Create your private, tropical paradise in your garden!  
KokoHusk® garden screens are innovative and natural looking.  
The KokoHusk® garden fencing system fits modern architecture and design!

KokoHusk® garden screens comprise unique gabions filled with coconut husk parts: a natural looking, sustainable lightweight product that can be assembled between posts quickly. Approximately 110 processed coconuts are used for a single screen.

The KokoHusk® garden screens are delivered completely filled with coconut husks.

*KokoHusk®* garden screens are handmade, making each screen unique. *KokoHusk®* garden screens are a great lightweight alternative to heavy rock-filled gabions. *KokoHusk®* garden screens are ideally suited for climbing plants and go well in both modern and classically landscaped gardens.

# KOKOHUSK® Garden Screens

Gabions pre-filled with Coconut Husk parts!

## Recommended Use

**KokoHusk®** garden screens can be mounted to hardwood poles (7x7 or 9x9 cm) for a classic look.

For a modern look, the screens can be fastened to galvanized steel posts.

The screens can be installed horizontally as well as vertically.

Additional decorative steel mesh pieces available separately.

## Size Range

Standard <b>Kokohusk®</b> garden screen	w x h	180 x 180 cm
Small <b>Kokohusk®</b> garden screen	w x h	120 x 180 cm
Low <b>Kokohusk®</b> garden screen	w x h	180 x 120 cm

**Kokohusk®** panels can easily be cut to size with pliers

Mesh size wire netting: 6x6cm

Depth of a **KokoHusk®** garden screen panel: 7 cm

Weight of a panel 180 x 180cm is around 35kg

Weight of a panel 120 x 180cm is around 25kg

## Mounting between hardwood poles

Hardwood pole 7x7 or 9x9cm. Mounting with 4 pieces special clips and 2 pieces bolt/nut per screen.

## Mounting between steel poles

Galvanized steel H-pole. Mounting with 4 pieces bolt/nut per screen.

## Durability

**KokoHusk®** is sourced from the coconut's outer layer, which makes it a natural product. The quality of durable tropical coco fibres is similar to that of tropical hardwood. Coco fibres are not subject to decomposition as they absorb very little water.

## Eco Friendly Product

**KokoHusk®** garden screen is a recyclable and sustainable product and uses a renewable resource. It is manufactured without the use of chemicals. The supporting metal mesh structure too can be recycled.

## Fair Labour Product

**KokoHusk®** garden screens are handmade in Sri Lanka. Your purchase supports their local economy. A percentage of the profit goes toward school supplies for the local employees' children.
